Art Unit: 2833

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grabbe et al (791) in view of Czeschka.

Grabbe, Figs 1-3, 5 & 7 show a receptacle housing 22 having a first face 34, a second face 32, a plurality of conductive elements 18 and a metallic cover 104 extending over the housing and terminating in a contact 101 adjacent to the first face for mating with a printed circuit board 6; a conductive housing 26 of a header 10 having parallel end walls 80 with opposed inner faces, a medial wall 78 having a first face and a second face, a plurality of conductive signal pins 20 passing through passages 16 and a separate grounding element 106 attached to the conductive housing for contacting the metallic cover 104 of the receptacle 22. Grabbe does not disclose the contact of the metallic cover being a grounding contact and the receptacle having an additional grounding contact adjacent the second face thereof. Czeschka, Fig. 1 shows a metallic cover 8 extending over a receptacle housing 1 and terminating in a grounding contact 8b and an additional grounding contact 76 adjacent a second face of the housing. It would have been obvious to one with skill in the art to modify the connector of Grabbe by forming the contact of the metallic cover and an additional contact adjacent the second face of the receptacle to be grounding contacts, as taught by Czeschka, in order to ground the connectors to the printed circuit boards.

3. Applicant's arguments with respect to claims 27-30 are have been considered but are moot in view of the new ground(s) of rejection.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
